PROBLEMA GUIA III/#2 (Algunos)

$$y = f(x)$$
 $y = g(x)$

$$y = f(x)$$

$$y = g(x)$$

$$y = g(x)$$

$$= -\frac{df(0)}{dx} = -\frac{dx}{dx} = -\frac{dx}{dx}$$

$$\int_{-\infty}^{\infty} f(x) \, \delta(x-\alpha) \, dx = f(\alpha)$$

$$= f(\alpha) \cdot 1$$

$$= f(\alpha) \int_{-\infty}^{\infty} \delta(x-\alpha) \, dx = \int_{-\infty}^{\infty} f(\alpha) \, \delta(x-\alpha) \, dx$$

$$= \int_{-\infty}^{\infty} f(x) \, \delta(x-\alpha) \, dx = \int_{-\infty}^{\infty} f(\alpha) \, \delta(x-\alpha) \, dx$$

Desde el punto de vista "operacional" se comple: f(x)8(x-a)=f(a)8(x-a)

$$8(x) = \frac{1}{2\pi} \int_{-\infty}^{\infty} e^{ikx} dk$$

Se comple que:
$$S(-x) = \frac{1}{2\pi} \int_{-\infty}^{\infty} e^{ik(-x)} dk = \frac{1}{2\pi} \int_{-\infty}^{\infty} e^{i(-k)x}$$

en esta altima integral hacemos el combio de veriable:

$$k = -\xi \implies Jk = -d\xi \implies \int_{-\infty}^{\infty} dk \rightarrow -\int_{-\infty}^{\infty} d\xi = \int_{-\infty}^{\infty} d\xi$$

$$0. \quad \delta(-x) = \frac{1}{2\pi} \int_{-\infty}^{\infty} e^{i\xi x} d\xi$$

$$= S(X)$$

$$= S(X)$$

$$S(-X) = S(X)$$

$$OED$$

$$\frac{1}{2} \int_{0}^{\infty} \frac{1}{8(x)} dx = \int_{0}^{\infty} \frac{1}{4} \frac{1}{8(x)} dx = \int_{0}^{\infty} \frac{1}{4} \frac{1}{8(x)} \frac{1}{4} \frac$$

h) Este item es una extension del item (a). Utilice inducción

e) Se tiene que
$$S(x) = \frac{1}{2\pi} \int_{-\infty}^{\infty} e^{ikx} dk$$

80 $S(ax) = \frac{1}{2\pi} \int_{-\infty}^{\infty} e^{ikax} dk$ su pongramos que $a \in \mathbb{R}$

estr es: $a = sign(a)|a|$ con $sign(a) = \begin{cases} 1, sia > 0 \\ -1, sia < 0 \end{cases}$
 $S(ax) = \frac{1}{2\pi} \int_{-\infty}^{\infty} e^{isign(a)|a|kx} dk$

haciendo $g = sign(a)|a|k \Rightarrow dk = sign(a) dg$

sign(a) so

$$\frac{1}{\sqrt{2}} \frac{1}{\sqrt{2}} \frac{1}{\sqrt{2$$

Finalmente sign(a) to
$$S(ax) = \frac{sign(a)}{|a|} \frac{1}{2\pi} \int_{\infty}^{\infty} e^{i\xi x} d\xi = \frac{S(x)}{|a|} \int_{\infty}^{\infty} e^{i\xi x} d\xi = \frac{S(x)}{|a|} \int_{\infty}^{\infty} e^{i\xi x} d\xi = \frac{1}{|a|} \int_{\infty}^{\infty} e$$
